

New Extended Version Powder Shaker

Width:60CM (OEM Service Optional)

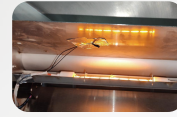

Equipped With Two Powder Storage Tanks:

Additional configuration of a second powder storage box allows the falling powder to completely fall into the storage box. Two powder storage boxes are used alternately, effectively avoiding waste.

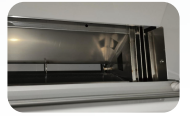

Constant Temperature of Powder Box:

There is a temperature sensor under the powder box. When the temperature does not meet the standard, the powder box will automatically heat up, ensuring that the powder remains dry and the pressing effect is not affected by the powder. Especially in humid areas in the south, the effect of automatic heating is particularly evident.

Powder Blocking Device:

A brand new powder control structure, with added baffles on both sides, allows all falling powder to fall into the powder box, avoiding powder loss, and the design of the baffles can significantly improve the utilization rate of powder.

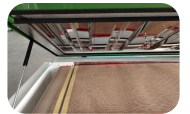

Intelligent Powder Sensor:

When the sensor senses that the weight of the powder on the paper is not enough, the powder box will automatically start spreading powder, ensuring that the printed pattern can fully touch the powder, thus achieving a perfect printing effect.

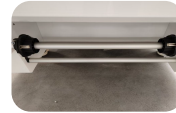

Intelligent Temperature Control:

The new machine retains the function of heating both top and bottom at the same time, with an additional 7 heating lamps added to the bottom and an extended mesh belt design, so that the material can be heated more fully, the pattern will not be deformed during demolding, the oil return phenomenon is eliminated, and the pattern can be kept in the most perfect state.

Tension Bar Media Take Up Device:

The new machine has added the function of tensionpaper winding, making the winding more neat. Move the original bottom fan to the side for more even heat dissipation.

Built-in Oil Fume Filter and Purifier:

The original side fume purifier is upgraded to a built-in purification structure, which allows dust and smoke to circulate inside the machine and reduce the leakage of dust and smoke.

Reduce the frequency of oil and smoke leakage

Built-in oil fume filter and purifier

Customization in different colors is available !

Shaking Powder and Color Fix Machine

Media Width	0-60CM
Applicable Medium	Nylon, Chemical Fiber, Cotton, Leather, Swimwear, Wetsuit, PVC, EVA, etc.
Powder Control	Powder shake control, powder control, powder direction and volume control
Heating & Drying Function	Multi-stage heating system, drying, cold air fan function

Rewind Function	Automatic induction winding	
Electrical Parameters	Rated Voltage: 220V	Rated Current: 22A
	Rated Power: 3.42KW	Power Consumption: 1KW-2.5KW
Powder Shaker Size	60cm:2241*994*945mm	60cm:G.W. 445kg N.W.425kg
Packing Size & Weight	60cm:2322*1122*1127mm
