

Double-station Electric Heat Press Machine

Fully automatic:

Move in all four directions, including up, down, left, and right

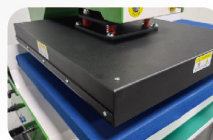

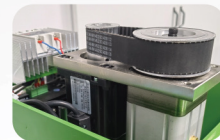

Electric control:

No manual pressing or air pump required.

Full servo motor:

Z-axis motor precisely controls temperature, pressing time, and lifting height.

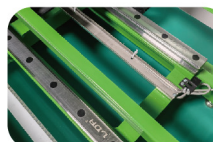

Integrated cast aluminum heating plate:

All heating wires are cast inside the heating plate, providing more uniform temperature heating and safer heating process.

Infrared laser dual positioning device:

Optional infrared locator, turns on when powered on, accurately locates the position of

Linear double guide rail:

The machine is equipped with double guide rails internally, making the movement of the heating plate more stable.

Four handling handles:

Two on each side for easy handling.

An Independently Developed PLC Control System

Covers all pressing functions and parameter settings

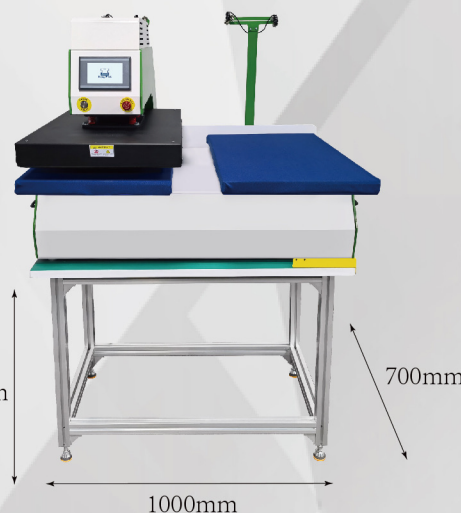

INTELLIGENT

Customization in different colors is available !

SPECIFICATIONS

Product Name	Double-station Electric Heat Press Machine
Printing Method	Heat Transfer Printing
Motion Method	Full electric automatic (No air compressor needed)
Mix Transfer Width	Unlimited
Max Transfer Width	50*60cm
Heating Temperature	0-200°C

Dimensions	Machine size	L1010*W740*H800mm
	Packing size	L1100*W840*H980mm
Weight	Net Weight	148KG
	Gross Weight	185KG
Working Power	4000W	
Power	110V/220V optional, 16A
